J. Biol. Chem. 275:10767-10771(2000).

-i- FUNCTION: Receptor for UDP-glucose and other UDP-sugar coupled G-proteins. Not activated by ATP, ADP, UTP or ATP.

-i- SUBCELLULAR LOCATION: Integral membrane protein.

-i- TISSUE SPECIFICITY: Highest expression in the placenta, adipose tissue, stomach and intestine, intermediate levels in the brain spleen, lung and heart, lowest levels in the kidney.

-i- SIMILARITY: BELONGS TO FAMILY 1 OF G-PROTEIN COUPLED RECEPTORS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        CARBOHYD

Chase P.B., Halonen M., Regan J.W.;

"Cloning of a human platelet-activating factor receptor gene:
evidence for an intron in the 5'-untranslated region.";
Am. J. Respit. Cell Mol. Biol. 8:240-244(1993).

-I- FUNCTION: RECEPTOR FOR PLATELET ACTIVATING FACTOR, A CHEMOTACTIC PHOSPHOLIPID MEDIATOR THAT POSSESSES POTENT INFLAMMATORY, SMOOTH-MUSCLE CONTRACTILE AND HYPOTENSIVE ACTIVITY. SEEM TO MEDIATE ITS ACTION VIA A G PROTEIN THAT ACTIVATE A PHOSPHATIDYLINOSITOL-CALCIUM SECOND MESSENGER SYSTEM.

-I- SUBCELLULAR LOCATION: Integral membrane protein.
-I- SUBCELLULAR LOCATION: Integral membrane protein.
                                                                                                                                                                          This SWISS-PROT entry is copyright. -I- FUNCTION: Receptor for cysteinyl leukotrienes. The response is mediated via a G-protein that activates a phosphatidylinositol-calcium second messenger system (By similarity).

-I- SUBCELLULAR LOCATION: Integral membrane protein.
-I- SUMILARITY: BELONGS TO FAMILY 1 OF G-PROTEIN COUPLED RECEPTORS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       CLT2_PIG
